Promoting Effect of Water Vapor on the Catalytic Activity of Cobalt-Exchanged MFI Zeolite for the Selective Reduction of NO by C\textsubscript{3}H\textsubscript{8}

Akira Shichi, Atsushi Satsuma, and Tadashi Hattori

The low temperature activity of Co-MFI zeolite for the SCR of NO by C\textsubscript{3}H\textsubscript{8} was greatly enhanced by the presence of water vapor.
